The World's Gold Pouring Into America

The United States has its first great victory to record as a result of the war in Europe. It is a peaceful victory that will shed its practical benefits into every channel of American industry and commerce.

For the first time in many years the balance of gold exchange is in favor of this country. In other words, European purchases of American commodities have greatly exceeded American purchases of European commodities during the past year. This is a condition which must benefit the United States because Europe's purchases must be paid for with European gold. This gold coming into the United States will be distributed through all trade channels. Such a situation should result in great business prosperity.

Read THE LITERARY DIGEST of March 6th (on sale everywhere to-day) and you will find a complete description of this important development. including a reflex of public opinion as shown by the newspaper press of Europe and America, regarding it. THE DIGEST makes plain to every reader the tremendous importance of this rare situation in its relation to the business conditions of the United States.

Has Japan Designs Upon China?

THE LITERARY DIGEST of March 6th, also sheds a flood of light from authoritative sources upon this phase of world-politics in the Eastern Hemisphere which had nearly escaped comment because of public attention being focused upon Europe and the war.

If you would have an interesting, impartial chronicle of the war in its many-sidedness, by all means join the million American readers who eagerly read THE LITERARY DIGEST each week.

It is not only for war-news that it is so widely appreciated in American homes, but because it deals with all other news of importance in the fields of foreign and domestic Politics, Science, Invention, Religion, Literature, Music. Drama, Sports, Trade, and Commerce.
